B4: same five positive-class test images, three fresh final-refit checkpoints
Seed 42 | pneumonia-logit Grad-CAM | original grayscale at left

B1/B2 native maps: 16×16; B3: 8×8. Bilinear upsampling to 64×64.
Shared color/opacity rule; intensities are not comparable absolute attribution across models.
p = saved final-test probability. No lesion annotations; maps do not establish correct localization.
